Subject: Record of Communication

I received a call today from a woman, Lupe Garcia, who lives at 3444 Gilpin. She is unhappy because the "white man" across the street had his yard cleaned up but hers has not been cleaned up. She has been told that her yard has high arsenic levels. She has renal cancer and her daughter and two-year old grand daughter live with her. She is afraid to let the grand child play outside for fear of exposure to arsenic. She wants to know when her yard will be cleaned up and hopes it can be cleaned up before Spring. She said that she had spoken with Pat and was awaiting materials Pat said that she would send her.

There are probably good explanations for all of this.

Pat, would you please update me on your response to this woman. Who can tell me when her yard will be remediated? Is there a reason why the neighbor across the street, who is apparently fairly new (and Anglo), received a cleanup response faster than did she?
